Note taker: _Wendy

Please add your /initials/ at the front of a comment

General Notes

...We did a timeline with pictures, predictions & solutions from the P2P

THE ORACLE

2025 - Governments Take Down massive amounts of data
- Censorship-resistant storage gets popular (Filecoin, IPFS)

2026 - Social Media Corporations & Governments surveil you; some monetize you
- More and more people tur to the "P2P COZY WEB" (Quiet)

2027 - Gen AI is indistinguishable from reality - Truth Fractures
- Wide-spread KEY-BASED ATTESTATION (to prove who YOU are, and who THEY are)

2028 - Elections lead to results people don't believe in
- ZERO BASED PROOFS used in Exit Polling acts as verifiable data

2030 - Climate Change induced extreme weather leads to mass migration; stateless people proliferate
- Title to property moves to digital ledgers

- Recoverable keys become widespread; Key recovery is not tied to geography, corporations or governments, but social key recovery (social vouching) becomes the core method.
- Scammers, thieves rule
- YOUR LOCK like cryptographically secure, PRIVATE DATA VAULTS become popular
2031 - Bitcoin consumes Massive Energy
- People start shorting Bitcoin, destroying it; P2P Currency that is Energy Sensive develops
2035 - The gap between rich and poor widesn, revolution ensues
- Small is good movement takes flight in AI and beyond
-Internet is abandoned; DWeb comes to serve small groups

Summary to be reported to the other DWeb Weekend participants

---

a)Bottom line: We need to anticipate the future and change the trajectory of the world
